

Configuring Settings for VPN

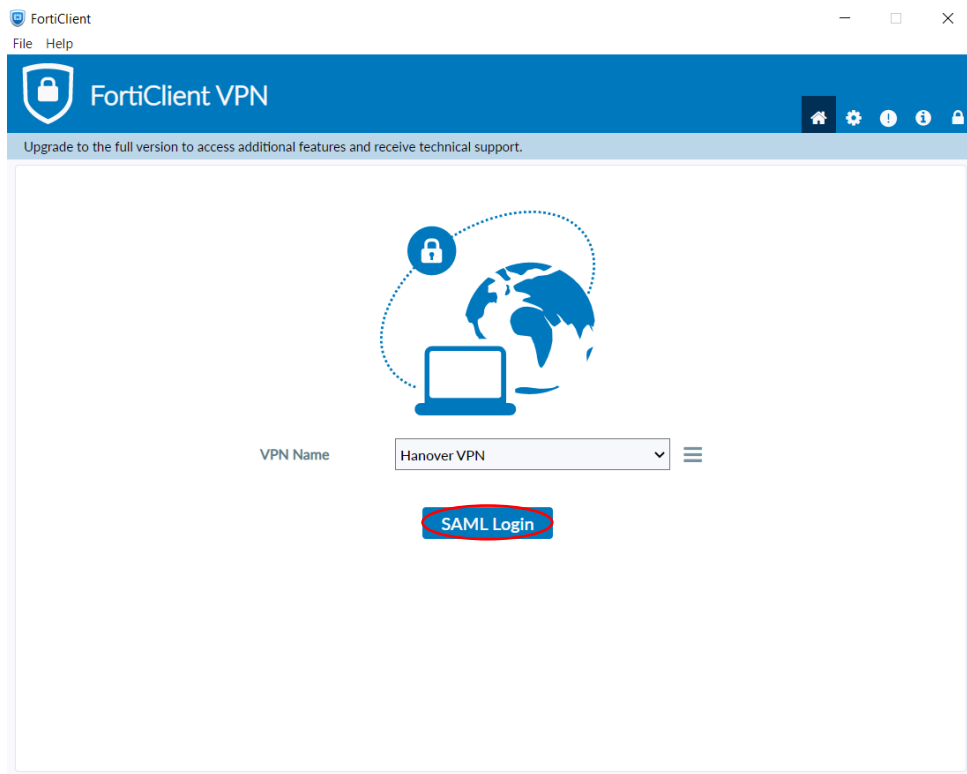

1. Open the “FortiClient VPN” application. Click the three lines next to “VPN Name” and select “Edit the selected connection”.

2. Fill in the fields as shown below. **Make sure the “Customize port” section is set to 443 and the “Enable Single Sign On (SSO) for VPN Tunnel” box is checked.** Click the “Save” button.

3. Click the "SAML Login" button.

4. Sign in with your Hanover email and password.
