

# FortiClient VPN

## Checking If Installed

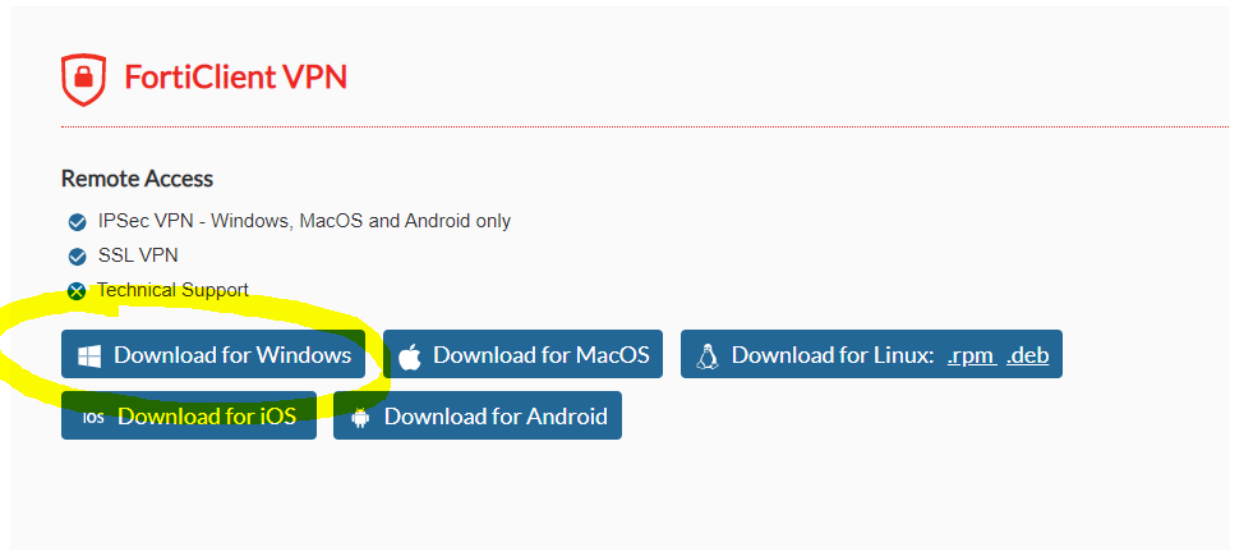

1. The FortiClient VPN agent may already be installed on your Hanover College computer. To check, click on the search bar in the bottom left of your screen and type FortiClient.
2. If FortiClient is installed, you should see the 'FortiClient VPN' application with a blue logo in your search results. (Pictured below)

3. If FortiClient is installed, you may skip to the 'Configuring VPN Connection' section of this documentation. If it is not installed, please use the 'Downloading FortiClient Agent' section below to install the software.

## Downloading FortiClient Agent

1. Go to [forticlient.com/downloads](https://forticlient.com/downloads)
2. Scroll down to the FortiClient VPN section of the page and click the 'Download for Windows' button to download the software installer (Pictured below)

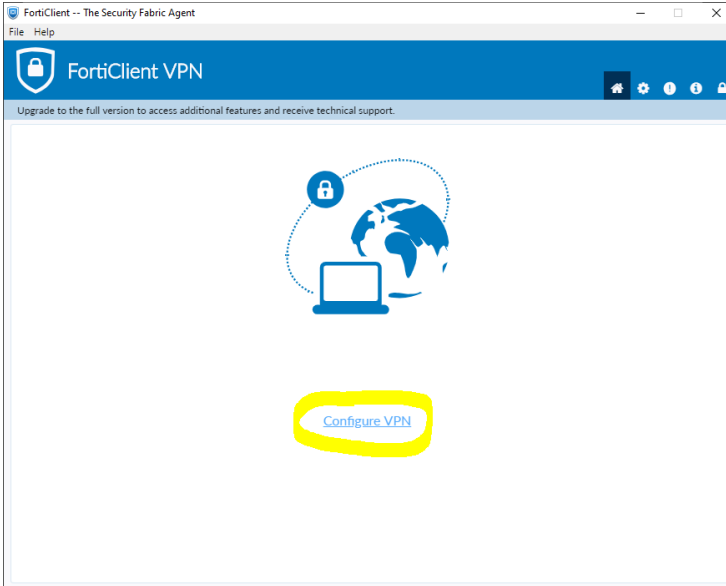

3. After the installer is downloaded, click the file to start the installation process. (File location will vary depending on the web browser you are using. The example below is using Google Chrome.)

4. If asked if you want to allow this application to make changes to your computer, select 'Yes'.
5. When the installer window opens on screen, follow its instructions until the installation is completed.

## Configuring VPN Connection

1. Open the FortiClient VPN application.
2. Click 'Configure VPN'

3. Fill out the following form as shown below and then click 'Save'.

4. Click the 'SAML Login' button and enter your Hanover account credentials (your email and password).
