Get Connected via Apple Phone/Computer

Connecting to the wifi network is straightforward on Apple phones and computers, but there are some steps you should take note of.

iPhone/iPad

- 1. In your device's wifi settings, locate the network you need to connect to. Click on the network name to begin getting connected.
 - a. HC Students for all students
 - b. HC Faculty Staff for all employees
- You should now be prompted to enter a username and password to connect. You will enter you
 Hanover username and password (your username is what is before the @ in your email
 address). Leave "Mode" as the default setting of "Automatic". When you have filled in your
 credentials, click the "Join" button.

3. Now you will see a pop up regarding the certificate. You will notice the "Not Trusted" warning marked in red, however you can see that the certificate is labeled "Idap.hanover.edu" and does not expire until July of 2023. This is our certificate; you may click the "Trust" button in the upper right corner.

If the certificate is labeled anything other than ldap.hanover.edu DO NOT click the "Trust" button. Please contact IT for help setting up your connection at (812)866-6899.

Macbook/iMac

- 1. Open the wifi menu and select the network you need to connect to.
- 2. You will be prompted to enter a username and password. Use your Hanover username and password at that time (your username is what is before the @ in your email address). Do not change the "No certificate selected" dropdown. Click the "OK" button to proceed. If you check the "Remember this information" box, you will not be prompted to sign in every time you connect to the network.
