

Adding Members to an Existing Group in Stream

You can add members to an existing stream group. Here is how.

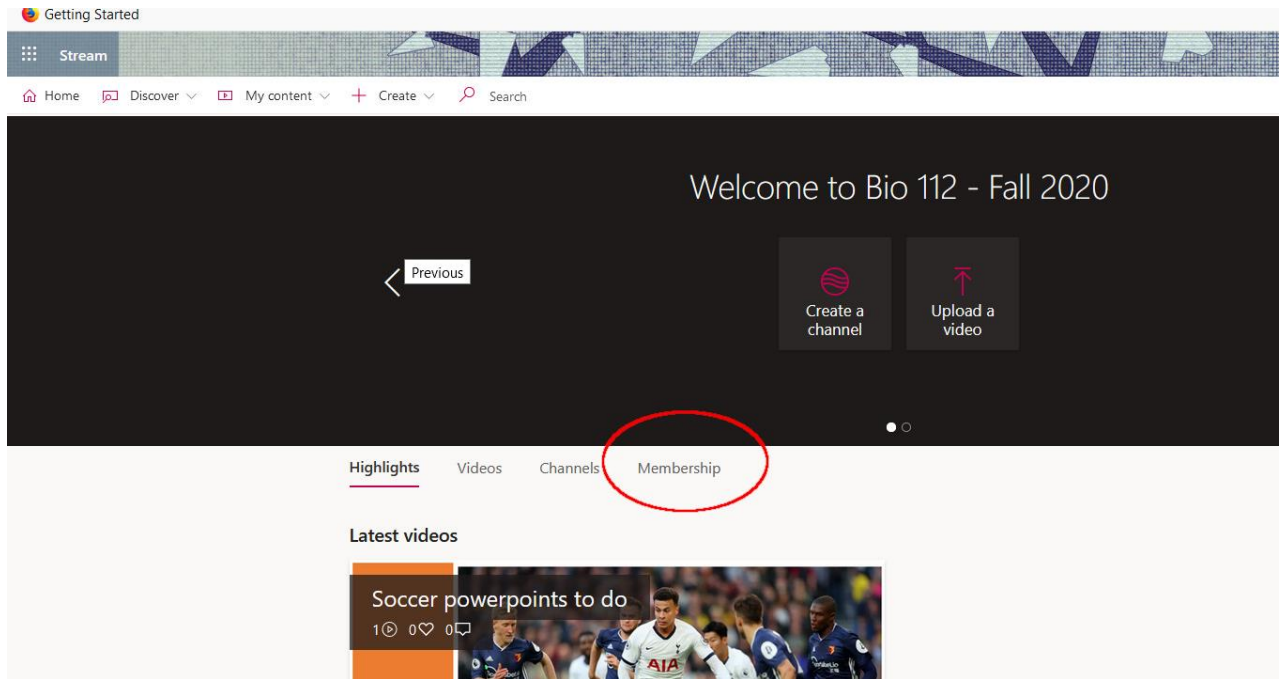

1. On Stream click on the downward arrow for My Content on the menu, select groups.

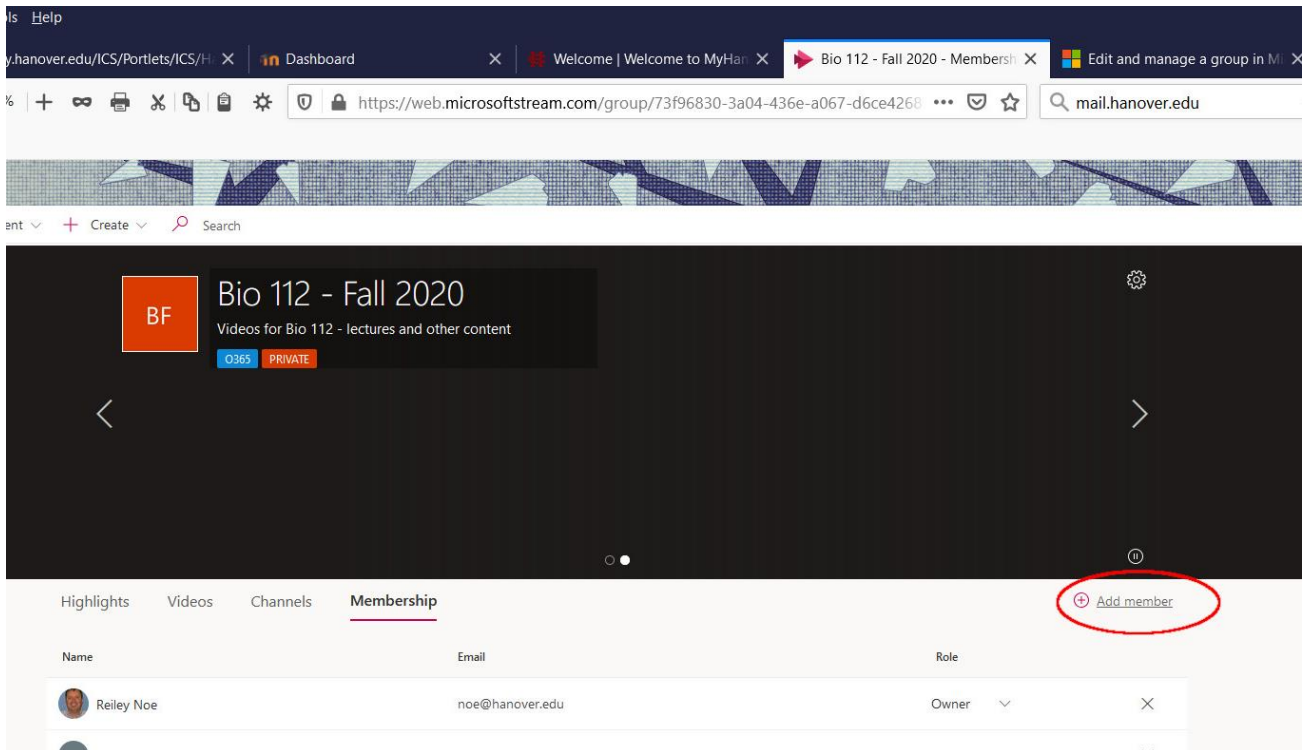

2. Click on the Stream group in question.

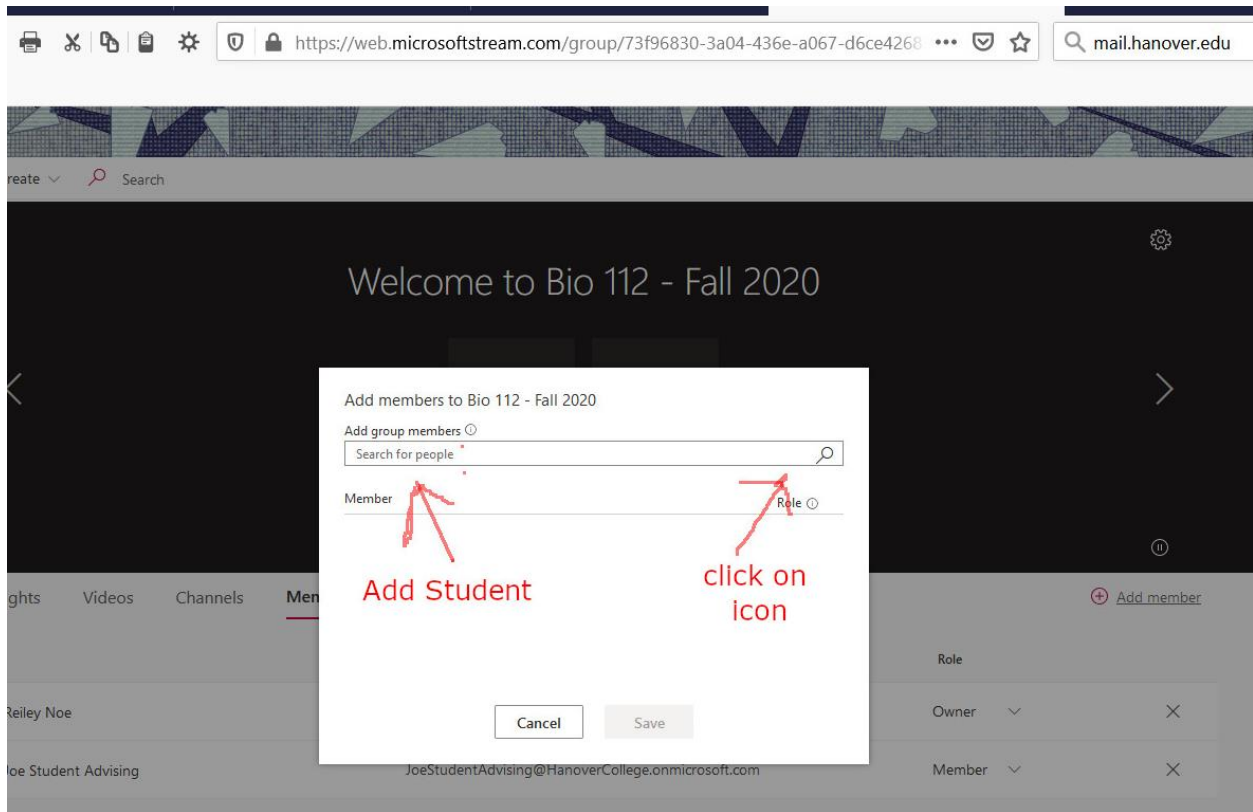

3. Click on the Membership tab.

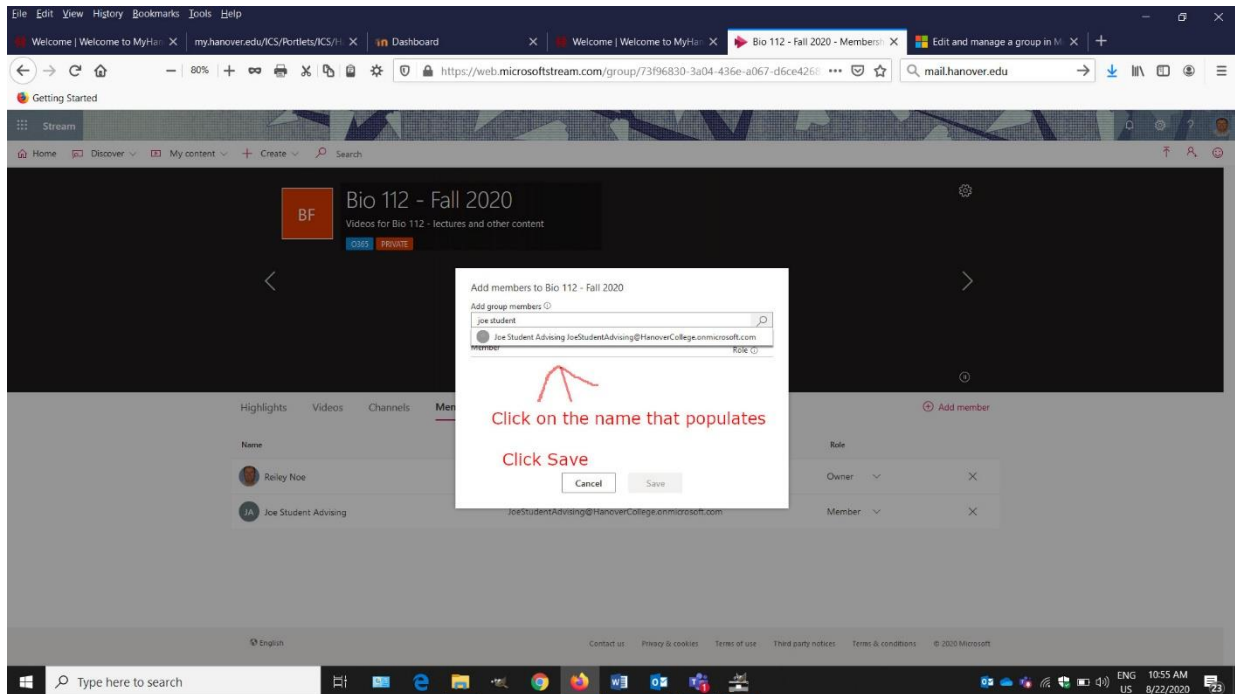

4. Click on the Add Member link on the page

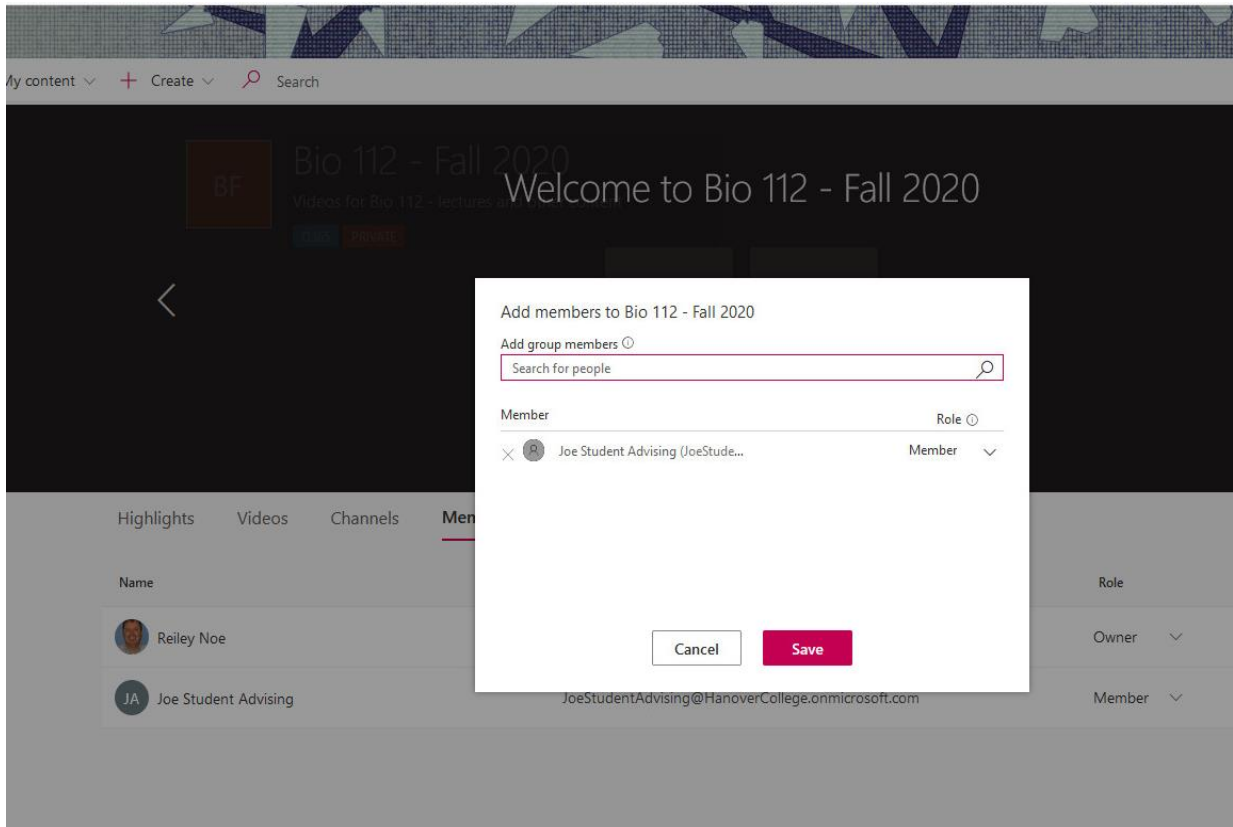

5. Click on Add Student and then click on the magnifying glass icon

6. Click on the name that populates below the search bar. Then click Save

7. Click Save

8. The student is added to the group for your class in Stream. After you refresh your screen, He or she will be included when you include the group in the permissions area going forward.
