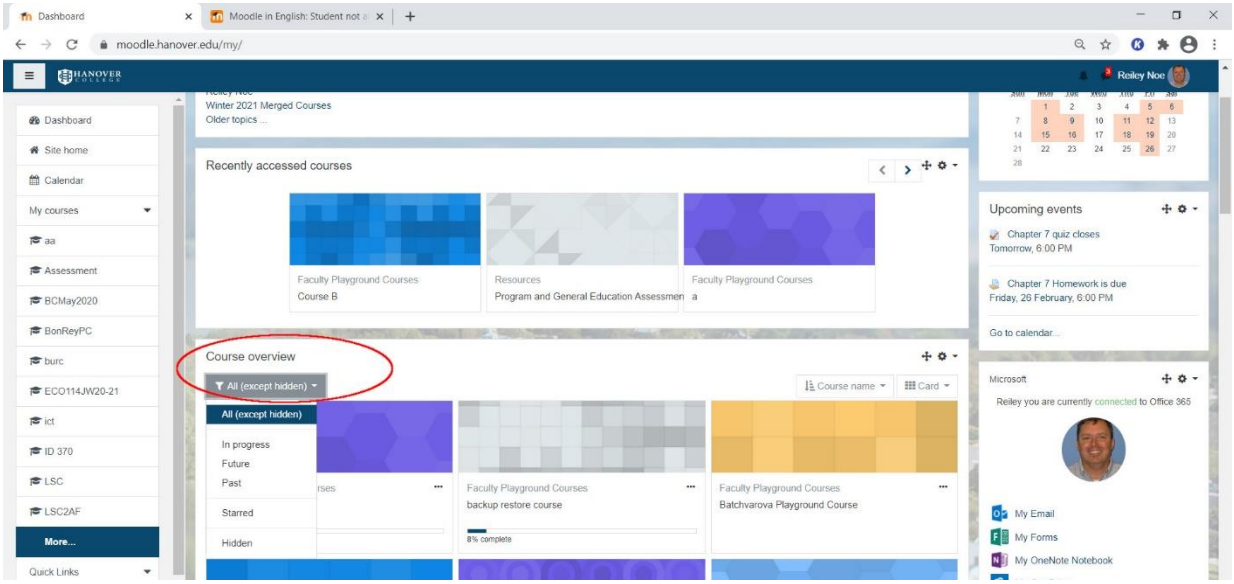
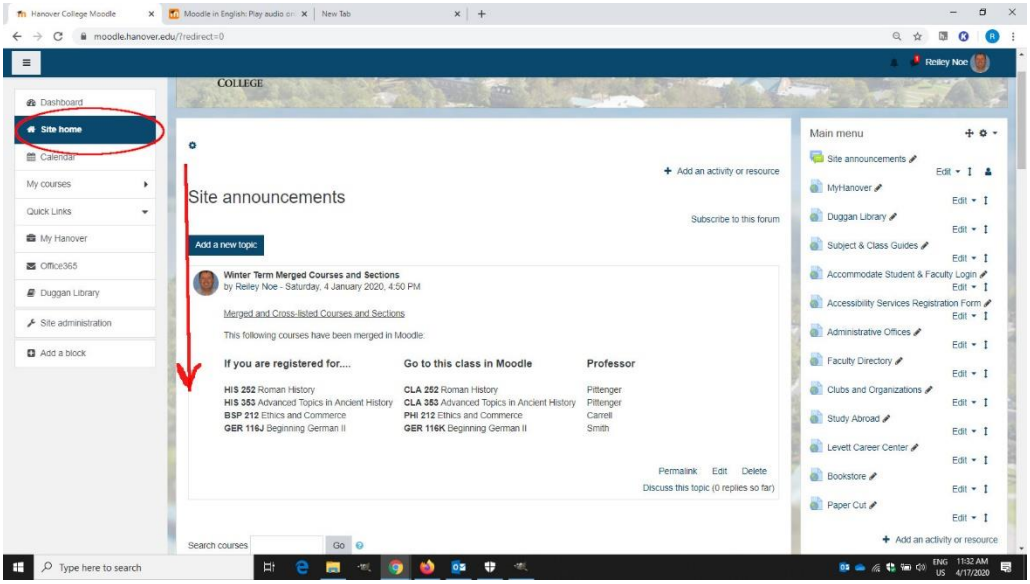
Alternate ways to find your courses in Moodle.

Some of your courses may not show up in your MyCourses tab in Moodle,. There are a few other ways to find your course if it doesn't show up under My Courses in the tiles to the left side of the screen.

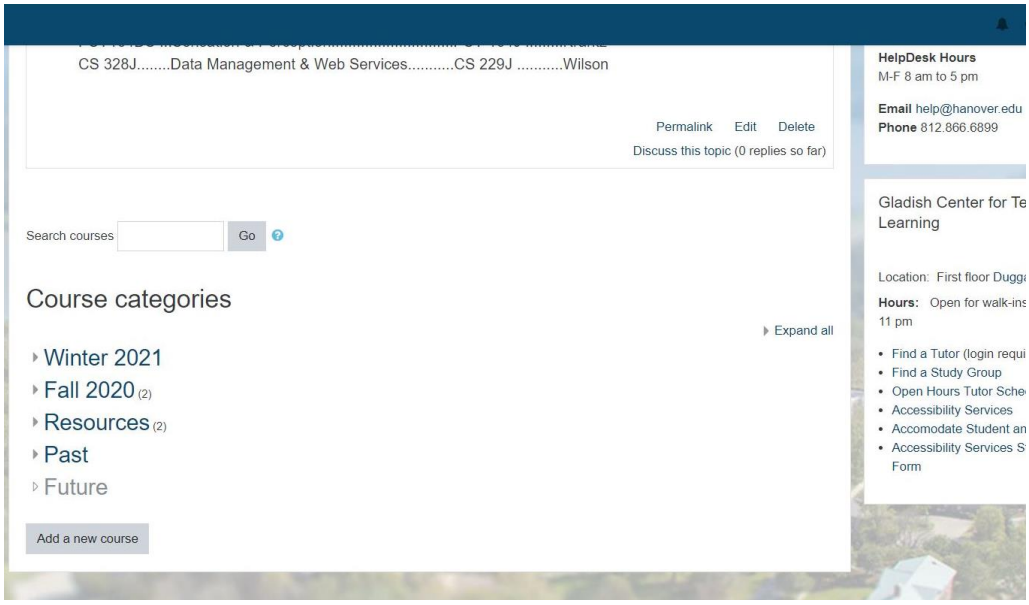
1. Go to Course overview and see if the course shows up in that area of the Dashboard if you change to All (except hidden) or in progress.



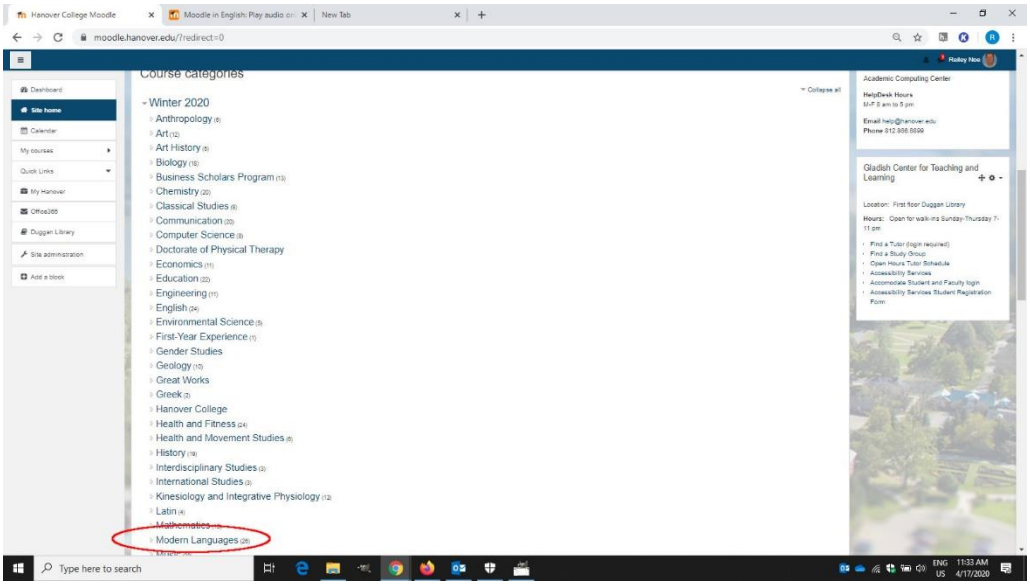
2. If that doesn't work, you can access the course in another way. Click on **Site Home**. If you don't see Site Home, **click on the 3 horizontal lines icon** in the Blue Ribbon. That will make the left side tiles appear. **Scroll down**.



3. The current term appears on top. You'll also see links for past terms. Select the term that you are looking for. Check Past for older classes. On Moodle.hanover.edu, Past will let you access courses from Summer 2019 through Summer 2020



4. Once you select a term, the list of courses appears. Find your department and if you click on that the individual classes will appear. You are still able to access the material in the class.



5. If you get into the class with this navigation, the course should show up in your 'recently accessed courses' area of Moodle going forward. And even if it does not, you can always access your courses with the Site Home>Term>Department>Course navigation.
