Restricting an activity to a particular student and a particular time.

If you have a student that will access an activity before or after the rest of the students, you can restrict access to the student for a particular time and hide it on the course page so that he or she cannot access it until a particular time, or he or she can view it at a particular time before other students.

1. Click on the Restrict Access at the bottom of the activity settings. Then click on the Add Restriction button.
