

## Making Categories in a question bank.

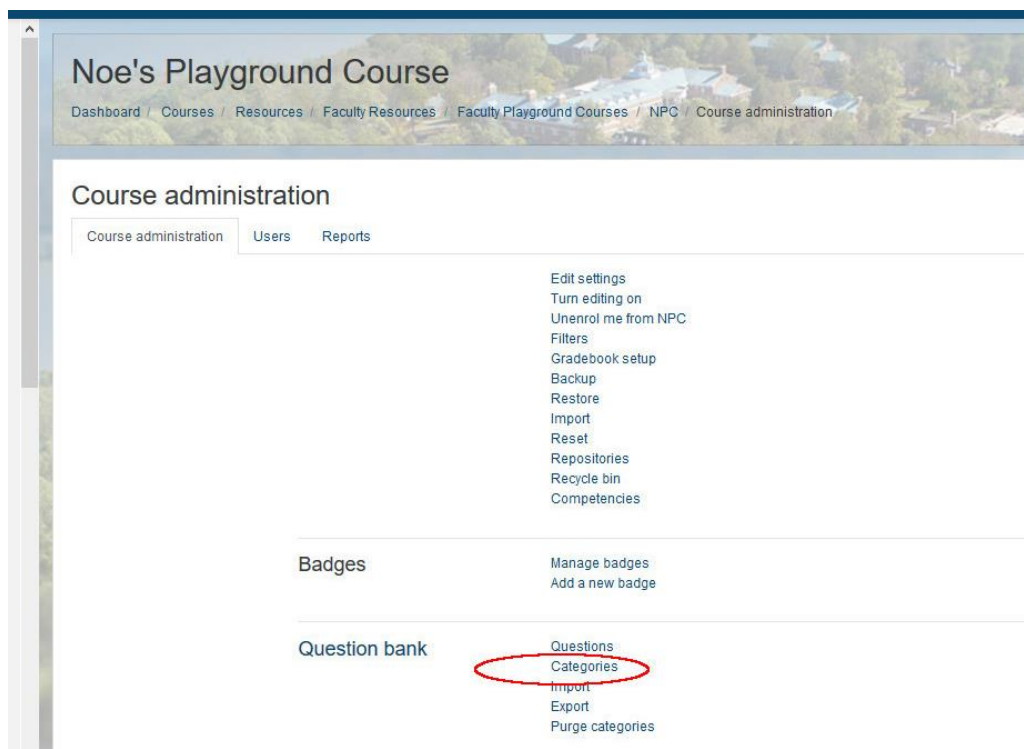

Question banks can quickly fill up with questions and be hard to look through. By creating categories in a question bank, you can organize questions around particular tests, units or content.

Question banks are particular to specific courses.

1. Find the course that you want to make categories for. Go to the Gear and click on More at the bottom of the menu.

2. Click on the Categories link. We'll make a category and then move pre-existing questions into the category. You can make categories first and then populate the categories with new questions.

3. On the Edit Category screen scroll down to the bottom and name the category (or one of the categories) for your quiz bank.

Question categories for 'System'

- **CR\_PROTOTYPES (19)**  
Category for CodeRunner question built-in prototypes. FOR SYSTEM USE ONLY.
- **Default for System (0)**  
The default category for questions shared in context 'System'.

▼ **Add category**

Parent category: Default for NPC (12)

Name: Quiz 1 - 70s music

Category info: [Rich text editor]

ID number: [Empty field]

**Add category**

These are required fields in this form marked with a red asterisk

4. The category appears on the same screen as you scroll up. Click on the Questions tab to move the quiz questions into the category.

Questions Categories Import Export Purge categories

**Edit categories**

Question categories for 'Course: Noe's Playground Course'

- **Default for NPC (12)**  
The default category for questions shared in context 'NPC'.
- **Quiz 1 - 70s music (0)**

Question categories for 'Category: Faculty Playground Courses'

- **Default for Faculty Playground Courses (1)**  
The default category for questions shared in context 'Faculty Playground Courses'.

Question categories for 'Category: Faculty Resources'

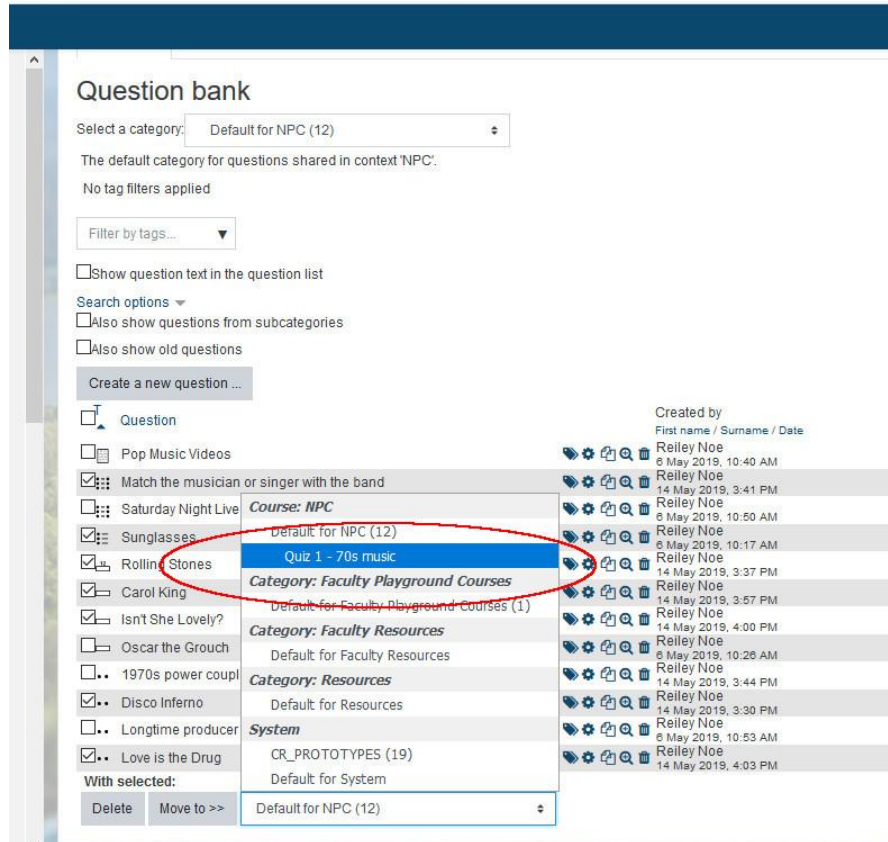

- **Default for Faculty Resources (0)**  
The default category for questions shared in context 'Faculty Resources'.

Question categories for 'Category: Resources'

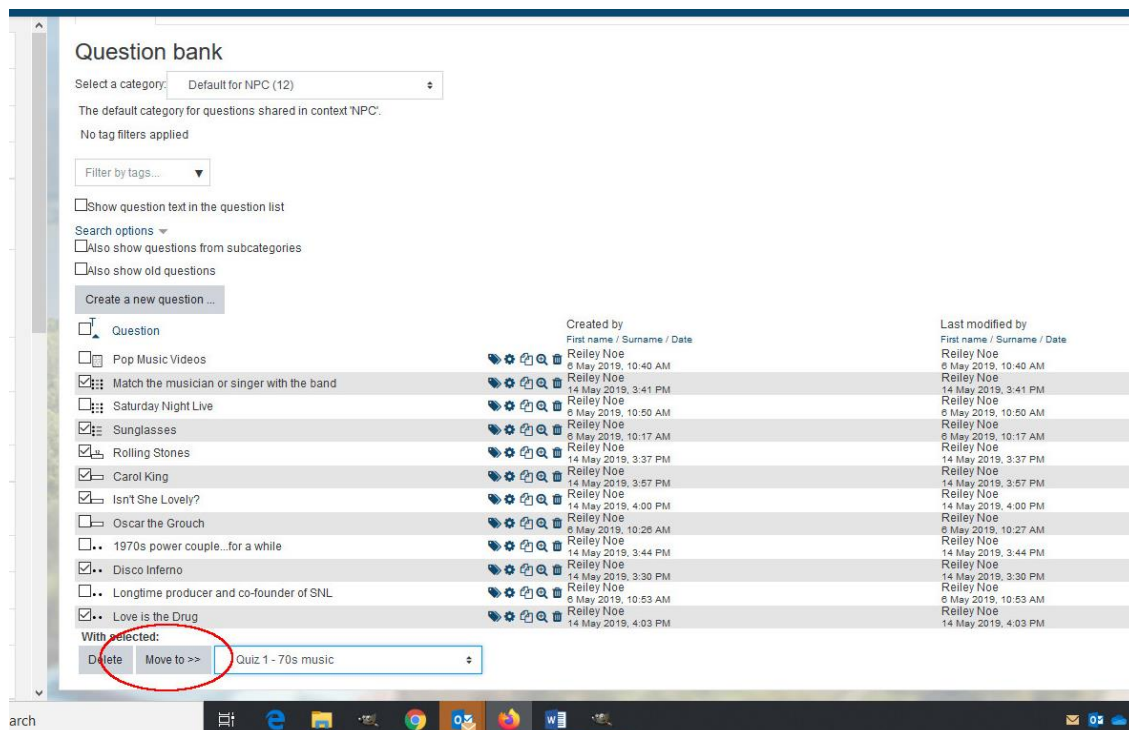

- **Default for Resources (0)**  
The default category for questions shared in context 'Resources'.

- On the list of questions, mark the ones that you want in the category. If you want all of them, click the tick box above the first question. Otherwise, pick the ones that you want moved there.

At the bottom, click on the menu next to Move to. You'll find your category. Select it on the menu.

- Click on the move to button to move the questions you've selected into the category that you've made.

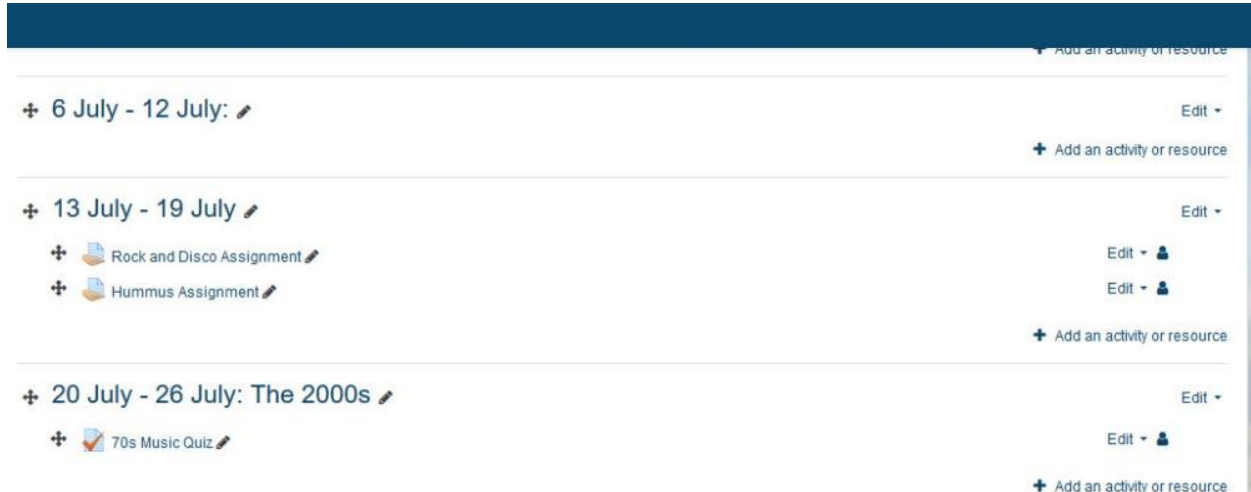

7. And here they are

The screenshot shows a web interface for a Question Bank. At the top, there are tabs for 'Questions', 'Categories', 'Import', 'Export', and 'Purge categories'. The main heading is 'Question bank'. Below this, there is a dropdown menu for 'Select a category:' which is currently set to 'Quiz 1 - 70s music (7)'. Below the dropdown, it says 'No tag filters applied' and 'Filter by tags...'. There are several checkboxes for search options: 'Show question text in the question list', 'Also show questions from subcategories', and 'Also show old questions'. A button 'Create a new question ...' is visible. The main content area shows a list of questions with icons for each: a question icon, a list icon, a document icon, a folder icon, a folder icon, a folder icon, a folder icon, and a folder icon. The questions are: 'Match the musician or singer with the band', 'Sunglasses', 'Rolling Stones', 'Carol King', 'Isn't She Lovely?', 'Disco Inferno', and 'Love is the Drug'. To the right of the questions, there is a 'Created by' column with the name 'Reiley Noe' and a date. Below the list, there is a 'With selected:' section with buttons for 'Delete', 'Move to >>', and a dropdown menu showing 'Quiz 1 - 70s music (7)'.

8. You can access these questions from the menu.....

This screenshot is similar to the one above, but with a dropdown menu open from the 'Select a category:' dropdown. The dropdown menu is circled in red and shows a hierarchical structure of categories. The path to the selected category is: 'Course: NPC' -> 'Top for Noe's Playground Course' -> 'Default for NPC (5)' -> 'Quiz 1 - 70s music (7)'. Below this, there are other categories: 'Category: Faculty Playground Courses', 'Category: Faculty Resources', and 'Category: Resources'. At the bottom of the dropdown, there is a 'System' section with 'Top for System' and 'CR\_PROTOTYPES (19)'. The main interface behind the dropdown is partially visible, showing the same question list and search options as in the previous screenshot.

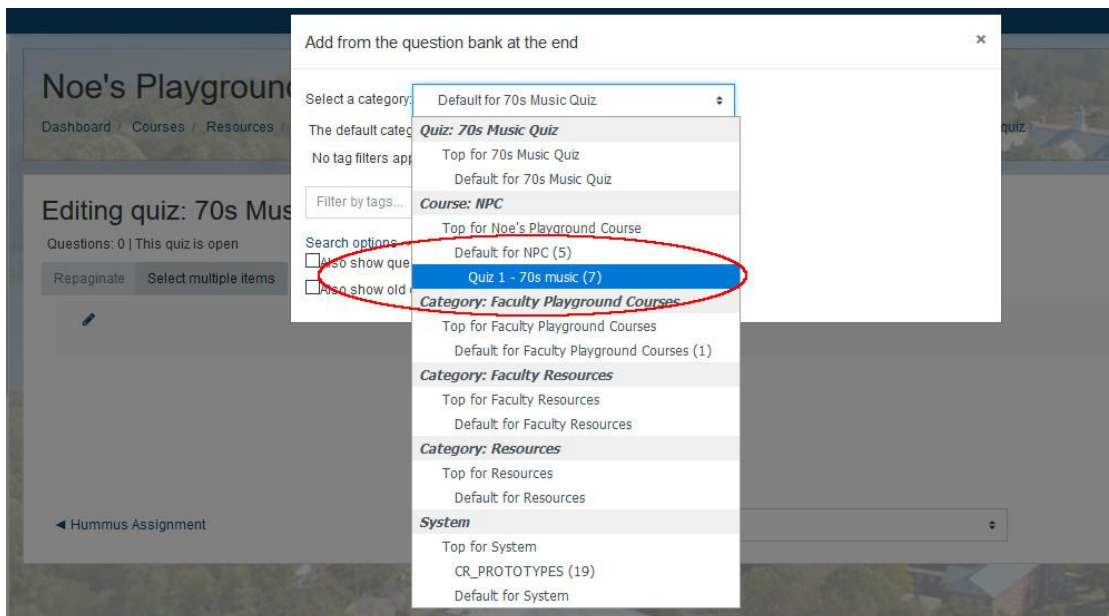

9. You can create a quiz on the course page....

10. You can edit a quiz and add question bank questions that populate just from that particular category.

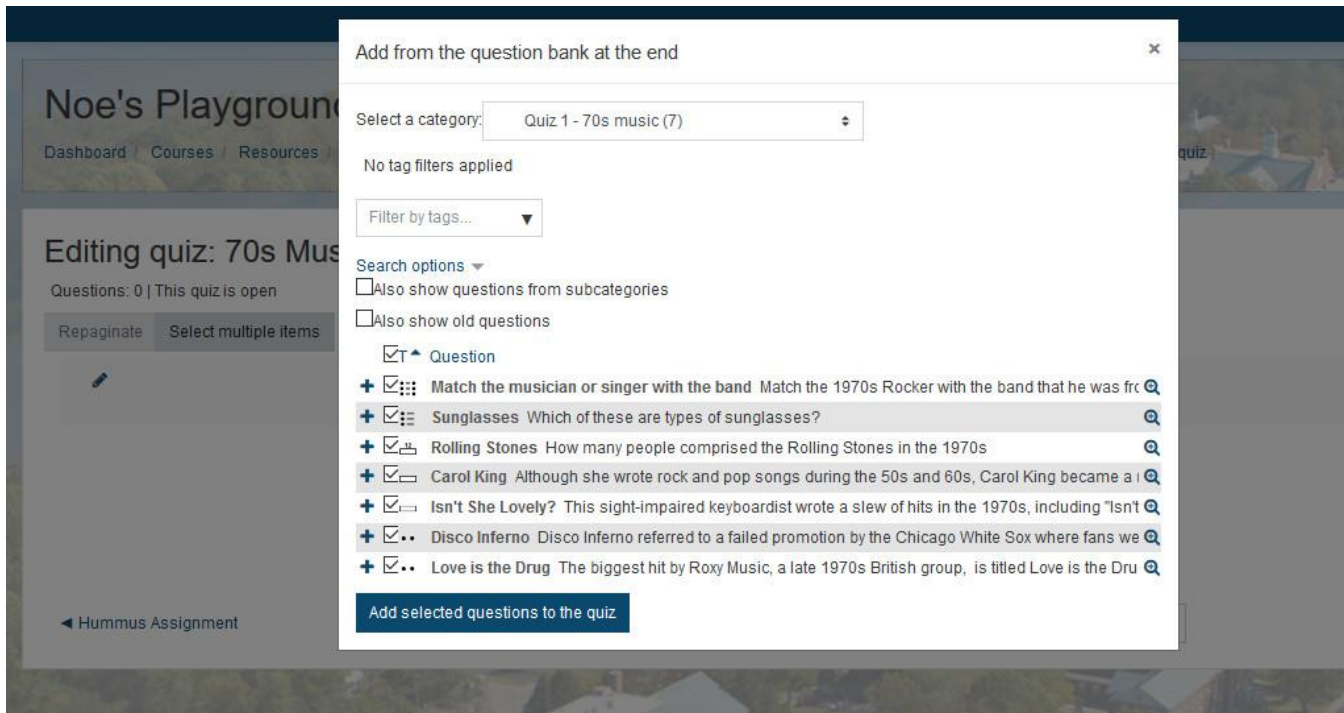

11. Select the category from the menu at the top to populate the quiz from the category.....

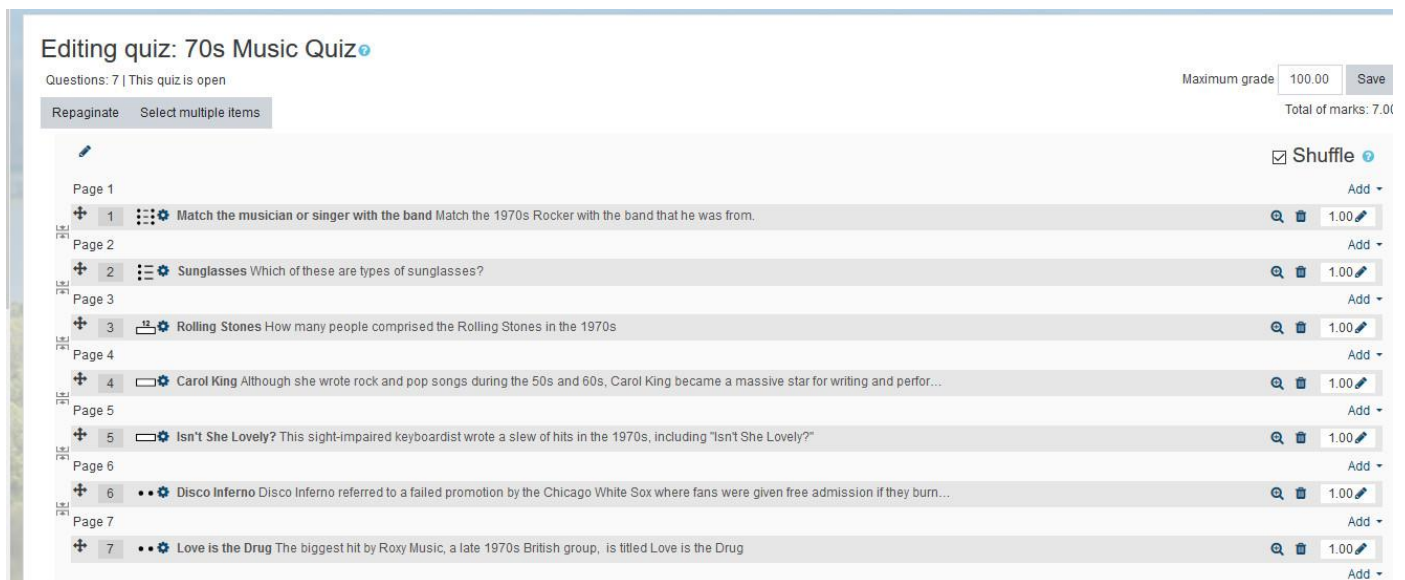

12. Select particular questions or click on the topmost tick box to select them all. Click the button at the bottom to add the questions to the quiz.

13. Click on Shuffle (to change the order of the questions for each student) and then click on save.

14. And here's the quiz....

# Noe's Playground Course

Dashboard / Courses / Resources / Faculty Resources / Faculty Playground Courses / NPC / 20 July - 26 July: The 2000s / 70s Music Quiz / Preview
